

Brief B: Customer Stock Enquiries

Sales Department, Sinar Maju Sdn Bhd

Background

Two sales executives answer about 60 customer emails a day asking for stock, prices and delivery times. The target is a reply the same day. On busy days, customers wait until the next morning, and some go to a competitor.

How it works today

- A sales executive reads each email and checks the stock list
- They type a reply with the price, stock and delivery time
- Discount requests and complaints are forwarded to the Sales Manager, Joanne Lee Pei Shan

The rules

- Prices and stock come from the stock list only
- A sales executive may give up to 5% discount. More needs the Sales Manager
- Complaints always go to the Sales Manager, never an automatic reply
- Reply in the customer's language (English or Malay)
- If an item is short, give the lead time from the stock list
- Customer personal data must not go into an AI tool the company hasn't approved

Your data (12 October 2026)

File	What it holds
brief-b-stock-list.csv	12 products with price, stock and lead time
brief-b-enquiries.csv	10 customer emails from one day

What to design

A workflow that drafts a reply to each enquiry for a sales executive to check and send, and routes the ones a draft can't handle. Test your design on the ten emails: which ones need a person?

Use the AI Workflow Canvas (ai-workflow-canvas.docx) for your pitch. You have five minutes to present and three for questions. You'll be scored with the rubric on the Module 13 page.
