Brief D: Staff Leave Queries

Human Resources Department, Sinar Maju Sdn Bhd

Background

The HR Department answers about 30 staff emails a day about leave: balances, carry forward, medical certificates and maternity leave. Two HR executives look each one up in the HR system and the leave policy. Staff wait up to two days, and the same questions come back every week.

How it works today

- An HR executive reads each email and looks up the staff member in the leave file
- They check the leave policy and type a reply
- Complaints and anything sensitive go to the HR Manager, Kavitha a/p Raman
- Leave itself is applied for and approved by the HOD in the HR system, not by email

The leave policy (summary)

- Up to 5 unused days of annual leave can be carried forward, and must be used by 31 March
- Maternity leave is 98 days; paternity leave is 7 days. Apply at least 30 days before the leave starts
- Medical leave needs a medical certificate (MC) from a registered doctor
- Unpaid leave needs the HOD and the HR Manager
- Staff may see only their own leave and medical records

The rules

- Balances come from the leave file only
- Complaints about a colleague or a manager go to the HR Manager, never an automatic reply
- Reply in the staff member's language (English or Malay)
- Health details, IC numbers and complaints must not go into an AI tool the company hasn't approved for personal data

Your data (12 October 2026)

File	What it holds
brief-d-leave-balances.csv	Leave records for 10 staff
brief-d-staff-queries.csv	10 staff emails from one day

What to design

A workflow that drafts a reply to each leave query for an HR executive to check and send, and routes the ones a draft must not handle. Test your design on the ten emails: which ones need a person, and what must never reach the AI?

Use the AI Workflow Canvas (ai-workflow-canvas.docx) for your pitch. You have five minutes to present and three for questions. You'll be scored with the rubric on the Module 13 page.

FICTIONAL TRAINING MATERIAL for the AI for Workplace (Advanced) course. All companies, people, addresses, phone numbers and registration numbers are made up. The tax rate is for training only.
