

Brief C: Monthly Spend Report

Procurement Department, Sinar Maju Sdn Bhd

Background

Every month the Procurement Department sends the Finance Director a spend report. It takes a procurement executive about a day and a half in Excel, and it's often late.

What the report must show

- Spend this year by department, against each department's annual budget
- Any department that has used more than 75% of its annual budget by the end of September
- The top five suppliers by spend
- Purchases that break the Procurement Policy: too few quotations (3.1) and split purchases (7.2)
- Anything unusual in the month, with a one-line comment

The rules

- Use Total (RM), which includes tax
- Leave out cancelled purchase orders, and count a duplicated row once
- Show rows with no department separately, don't guess the department
- The Finance Director reads the report; the procurement executive checks it before it's sent

Your data (to 30 September 2026)

File	What it holds
brief-c-purchase-history.csv	Purchase orders, January 2025 to September 2026 (the Module 05 file)
brief-c-department-budgets-2026.csv	Annual budget for each department

What to design

A workflow that produces the report each month for a person to check and send. Test your design on the data: which departments and purchases should the report flag?

Use the AI Workflow Canvas (ai-workflow-canvas.docx) for your pitch. You have five minutes to present and three for questions. You'll be scored with the rubric on the Module 13 page.
